Johnson Controls is a world leader in smart buildings, creating safe, healthy and sustainable spaces. For nearly 140 years, we've made buildings better and now we're transforming them again with our award-winning digital technologies and services. We're using artificial intelligence and data driven solutions to give you deeper insight into your building's health, sustainability and performance. It's changing the way we design, operate and maintain indoor environments and driving to a new era of autonomous buildings.

We deliver the blueprint of the future for industries such as healthcare, schools, data centers, airports, stadiums, hotels, manufacturing and beyond through OpenBlue, our comprehensive suite of connected solutions.

Johnson Controls offers the world's largest portfolio of building technology, software and services. Supported by a team of more than 100,000 dedicated employees working across 150 countries, we're helping customers achieve their sustainability goals and power their mission.

Throughout our history, Johnson Controls has conducted business with integrity. Our dedication to "do the right thing" improves our long-term business performance, reputation, productivity and employee retention.

Our Company's ongoing success stems from our deeply engrained culture of ethics and integrity. Acting with integrity allow us to meet the high expectations of our customers, partners and communities, and gives us a competitive advantage. Doing business with integrity is the only way to do business.

We promote sustainability through the way we do business, the solutions we provide and our engagement in society.

Johnson Controls has long understood the value of diversity and inclusion. It is present in everything we embody – from our values to our Leader Expectations Model. Building on this history, our leadership is moving diversity and inclusion beyond a foundational value to a business imperative.

Fire Maintenance and Support:
Fire safety is a fundamental mandate for every enterprise, facility, campus, and municipality. Fire safety begins with fire detection, and fire detection means everything from components—sensors, initiating devices, annunciators, and control panels—to integrated systems.

We are leaders in this vital arena because of our depth of expertise in creating reliable and sophisticated fire detection products and technologies. Our worldwide customers rely on our experience to develop and deploy solutions in tandem with our many global partners. We use the latest technology developments to set the bar higher with systems that are more configurable, more scalable, and more automated to help you protect your people and your assets.

Johnson Controls offers a suite of advanced connected life-safety services and technologies powered by OpenBlue. This suite is combined with our technicians' extensive industry knowledge and training to help ensure improved performance and reliability, code compliance, and operational efficiency of customers' fire and life-safety systems.

Experienced service specialists at your fingertips. Providing best-in-class service is in our DNA.

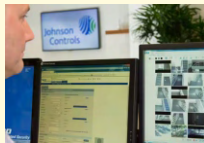

OpenBlue AI technology empowers you to manage your operations more systematically for greater visibility, enhanced performance, proactive planning, and overall building optimization.

We offer scalable service options across a comprehensive range of HVAC, fire protection, and security services, delivering the services you want, the way you want them.

Security Maintenance and Support:
Security systems require maximum uptime to be as effective as possible, and their technology hardware requires maintenance and inspections, just as IT platforms and networks need maintenance and updates. Our Tailored Security Service Solutions, including a la carte options, enables you to select the service level that best meets the needs of your business.

Proactive inspections, scheduled maintenance, and technology assessments maximize uptime.

Predictive analytics and data insights improve system planning and budgeting.

Improved internal security practices help mitigate risk and enhance cyber security.

Access control is the first line of defense when it comes to the security of your property. With a host of trusted brands in the industry, Johnson Controls offer an extensive range of products and services to suit establishments of any size and type.

Protecting your home and business is of the highest priority. Identifying potential physical threats at the earliest will contribute to safeguarding your assets, quickly alert the right authorities, and also prevent any untoward incident from even occurring.

Cameras have always been an integral part of any monitoring system and is extensively used, now more than ever. Recognizing the potential of video surveillance to enhance security, Johnson Controls brings you integrated solutions to simplify as well as strengthen your video surveillance systems.

Industries We Deal:
Data Centers, K-12 Education, Federal Government, Global Marine and Navy, Residential, Healthcare, Hospitality, Industrial and Manufacturing, Higher Education, Local Government, Public and Affordable Housing, Sports and Entertainment, State Government, Transportation, Urban Markets.
